

“INLAND SHIPPING in the Netherlands and Europe”

Rob Huyser

Director Maritime Affairs

Ministry of Transport, Public Works and Watermanagement

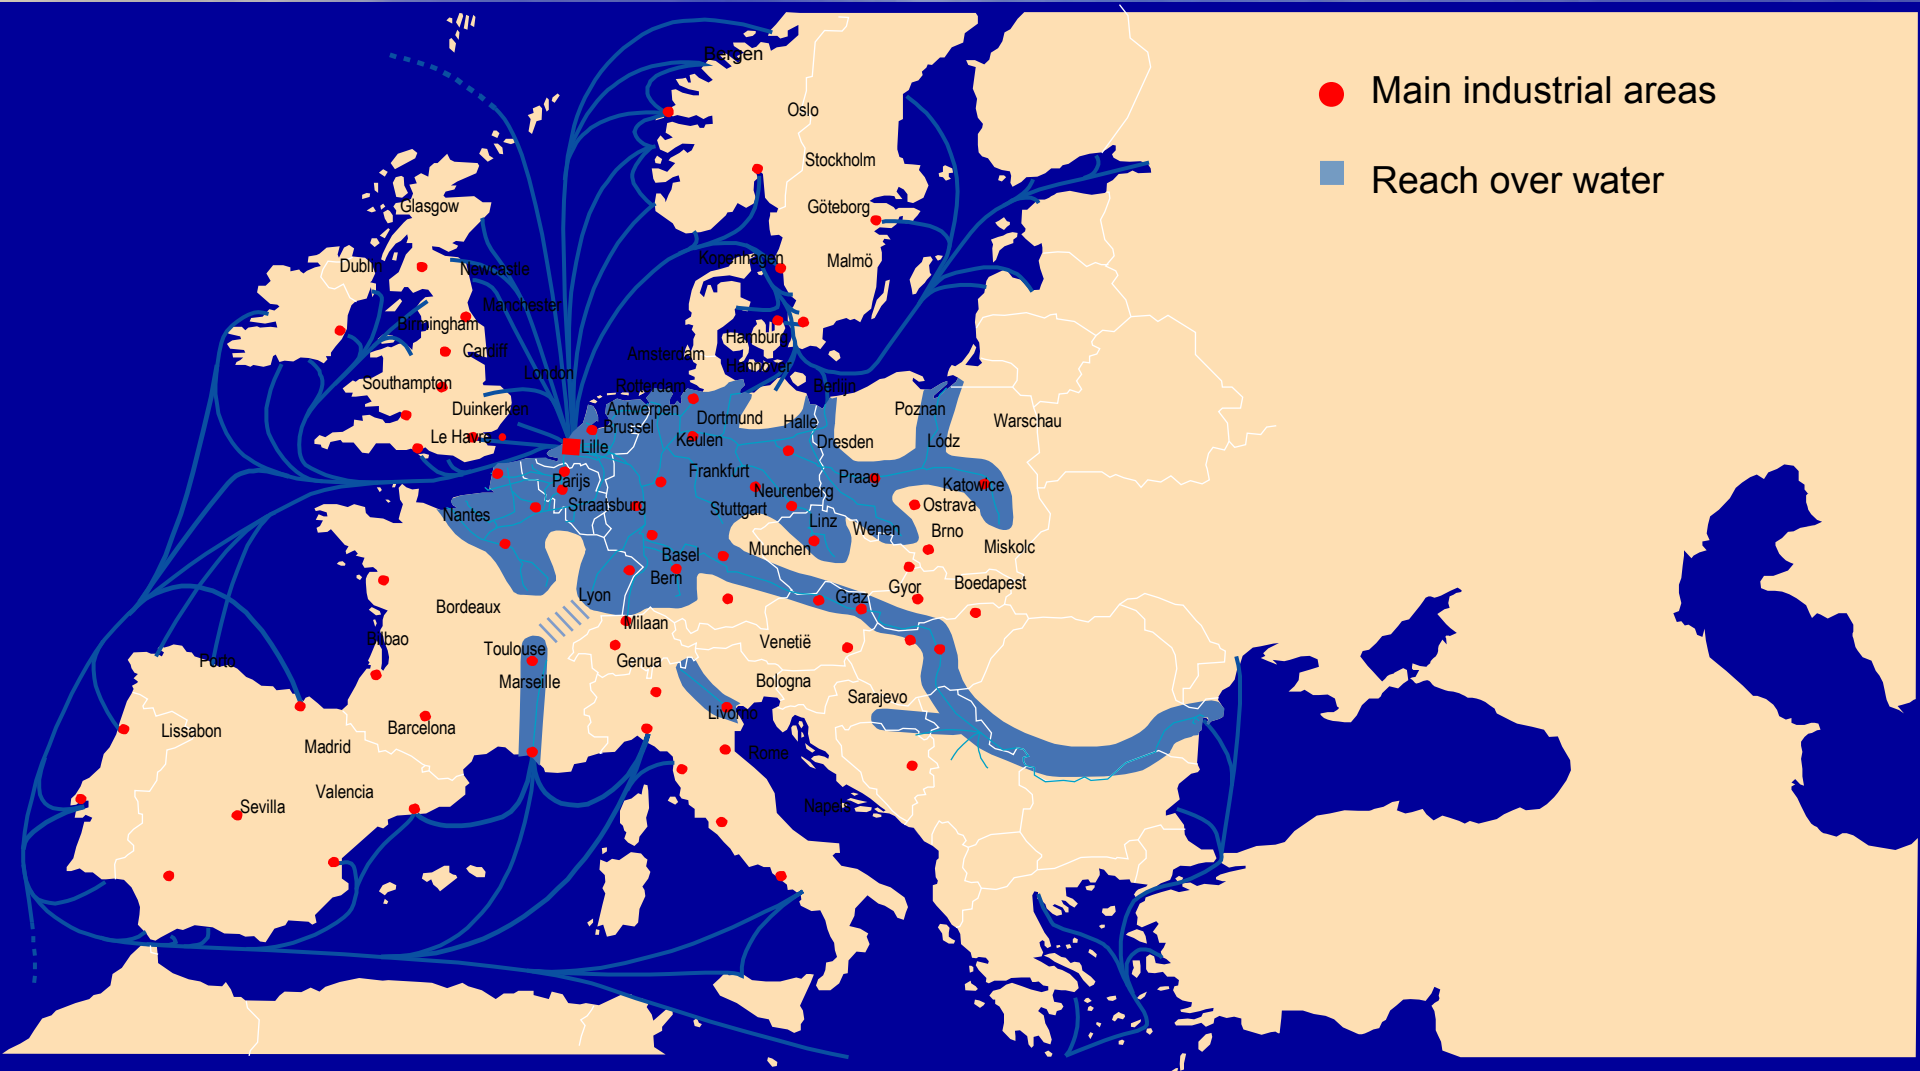

The Netherlands

Brasiliá, March 4, 2009

Why has inland navigation become such an important mode of transport in the Netherlands?

- Geographically favourably located "Gateway to Europe"
- Inland Navigation as part of maritime cluster

Intra European transport

Vessels

The importance of the inland navigation sector

- Economic growth; position of the Dutch ports and hinterland connections
- Alternative for road congestion
- Good for safety and the environment

Government policies in the Netherlands

- Investment in infrastructural projects
- IT and innovation
- Safety
- Environment
- Regulatory framework

Mutual Cooperation

- For a safer, cleaner and a more efficient transport system in Brasil inland shipping offers big opportunities
- The Netherlands has expertise, products, services and companies to assist Brasil in this challenge

Thank you for your attention
